NEWMAN FIREPLACES

Quality & style is our passion

Introduction

We hope you enjoy browsing through our latest electric fireplace suite brochure. Newman Fireplaces are proud to offer Flamerite electric fires alongside this longstanding British electric fire manufacturer. All electric fires shown are available individually or as a complete fireplace suite. The high quality electric fires with the option of the Newman designed fuel bed are designed and built in Great Britain by Flamerite fires to the highest standard and now we are offering a range of high quality natural stone fireplaces to match, specifically designed to allow installation onto a suitable flat wall without the need for any chimney or wall recess. We believe that a realistic log effect electric fire deserves a realistic fireplace so what better choice is there than one of our high class natural stone fireplaces to compliment.

Our fireplace range is manufactured from high quality limestone and various natural stones with each piece of stone being carefully selected in our own factory to ensure each fireplace when complete is top class, we feel this is essential as you will spend many years sitting and admiring your important purchase and you deserve the very best available from our dedicated manufacturing facility. All of our fireplaces can be made to measure subject to request and there is the option for each fireplace to be made in various natural materials as shown within this brochure. For customers with existing chimneys please see our other conventional fireplace brochures, these fireplace models can be adapted to fit our electric fire range, conversely these could also be adapted to accommodate flat wall installation if required.

Advantages of electric fireplace suites.

- *No requirement for a chimney.*
- *Zero heat loss through chimney as not required.*
- *Economical installation costs when compared to gas and solid fuel appliances.*
- *More environmentally friendly as zero combustion from the appliance.*
- *Healthier internal and external environment when compared to solid fuel stoves.*
- *Lower maintenance and service costs compared to gas and solid fuel appliances.*
- *More versatility to the installation position, all that is needed is a suitable and serviceable mains power socket nearby and a suitable flat wall.*
- *Realistic flame and log effect.*
- *Versatile control when using the app.*
- *Very low running costs to the flame effect.*
- *High efficiency.*

Type: Natural granite
Finish: Honed or polished
Colour: Black
Pattern: Light to medium (Speckle).

Vulcan granite

Type: Natural granite
Finish: Flamed
Colour: Combination of mottled black, grey, beige & white.
Pattern: Mottled can also contain a silver fleck.

Note: The description and picture of each natural material is just a guide it is not guaranteed as natural material will be subject to variation.

Electric Fires

- All electric fires and down lights must be installed by a suitably qualified and competent electrician to all relevant building regulations, any rules in force and the manufacturer's instructions.
- All products are protected by patents, registered design, copyrights and intellectual property rights. Newman Fireplaces Ltd. and Flamerite Fires Ltd. will protect these rights.
- All specifications are subject to change without prior notice.
- All goods should be inspected for quality and damage before installation, no refunds will be given regarding this after the product is installed.
- The electric fires shown in this brochure have been designed to offer an outstanding simulated log effect that can be enjoyed all year round, the built in fan heaters are not suitable as a primary heat source, although they may provide a secondary heat source to the room the fire is installed, this can vary widely depending on the size of room and how well the room is insulated therefore no guarantees can be made to the effectiveness to the room temperature when the fan heater is used.

Fireplaces

- We pride ourselves with detailed inspection and selection of each and every raw stone block we use and every process thereafter, however stone is a natural material and variation will occur. This will include shading, veining, fossils and crystal markings. This is the beauty of natural stone and sets it apart from a man made counterpart.
- Every effort has been made to show correct colour representation, although no guarantees can be given due to the printing process. Customers are advised to view all products and samples at their fireplace retailer.
- It is strongly recommended that your selected retailer surveys your intended installation site and all relevant items before purchasing any of our products.
- All goods should be inspected for quality and damage before installation, no refunds will be given regarding this after the product is installed.
- All of our products must be installed by a suitably qualified, competent and experienced installer complying with all relevant building regulations and any rules in force and manufacturers instructions.
- Any description used to any product is in the view of the editor only and most not be used as a factual statement.
- Dimensions are approximate.
- Any ancillary item shown in this brochure including ornaments, decorative logs and furnishing etc is not part of any fireplace sale including the electric fire appliance. (The electric fire is included only if the fireplace is purchased as a complete fireplace / electric fire suite).
- We supply only to fireplace retail specialists within the UK. This has the advantage of viewing some of our products usually within close proximity to where you live. Also the dealer can offer professional advice and surveys for your chosen product giving you total piece of mind, a very important part of any fireplace purchase.
- Newman Fireplaces Ltd always strive for continued improvement, therefore designs and products are occasionally altered or discontinued without prior notice (a reserved right). It is advised that you contact your fireplace retailer for advice for any known change before commencing and planning or any associated works for your intended purchase.
- It is advised that when any natural stone fireplace has fully dried after installation, that all surfaces are sealed with a suitable stone sealer. Ask your fireplace dealer for advice.
